Centre of Excellence

National Outreach Project

CWICE is expanding its services nation-wide!

Thanks to the generous support of the Northpine Foundation, CWICE is developing a new program dedicated to building capacity across the child welfare sector to better support Government-Assisted Refugee (GAR) families nationwide. CWICE will extend its support to six additional provincial child welfare agencies and Refugee Assistance Program (RAP) Centres across Canada.

The CWICE National Outreach Project is designed to:

- Enhance professional capacity by equipping child welfare practitioners with specialized knowledge and tools to address the unique needs of GAR families.
- Facilitate collaboration by sharing best practices and fostering a supportive network across child welfare agencies.
- Strengthen equity and inclusivity in service delivery, ensuring every family receives culturally informed and needs-sensitive care.

The National Outreach Project will strengthen local capacity, promote cross-provincial collaboration, increase service quality, and improve outcomes for vulnerable children and families.
